

# HPE NJ5000 Walljack Switch Series

## Key features

- Innovative switch with in-the-wall installation
- Easy, secure port expansion without new cabling
- PoE or PoE+ powered with PoE forwarding on up to two ports
- Supports both fully-managed and unmanaged modes
- Limited Lifetime warranty

## Product overview

The HPE NJ5000 5G PoE+ Walljack is a compact 10/100/1000 switch that can be installed in a standard wall outlet box, quickly converting an existing single-port LAN wall outlet into four-switched Gigabit Ethernet ports. This walljack can provide a simple solution for adding network ports without running more cabling. Unlike conventional desktop switches, the NJ5000 resides out of the way—literally in the wall—and so is more secure from theft and difficult to accidentally disconnect or damage.

The innovative HPE NJ5000 Walljack provides four Ethernet ports for local connectivity plus one uplink port. It can be powered via standard PoE+ (IEEE 802.3at) or PoE (IEEE 802.3af), with capability of forwarding PoE on up to two ports to directly power-attached devices such as IP phones or wireless access points.

The HPE NJ5000 Walljack supports Layer 2 switching, with features like VLANs, Spanning Tree, RSTP, and MSTP. It comes with full enterprise-class management capability via the SNMP, CLI, and Web GUI, with flexibility of changing to unmanaged mode for plug-and-play simple deployment. The switch includes a limited lifetime warranty.

## Features and benefits

### Connectivity

- Five-Port GbE wirespeed switching

Five ports of gigabit switching; one designated uplink on the inside and four front ports facing downward

- PoE/PoE+ powered device

Device is powered by Power over Ethernet. This simplifies set-up in a PoE-enabled environment. Compatible with IEEE 802.3af PoE or 802.3at PoE+. User must provide a standards-compliant PoE switch or PoE power injector

- Auto MDI/MDI-X

Adjusts automatically for straight-through or crossover cables on all 10/100/1000 ports

- Half duplex and full duplex auto-negotiation on all ports

Maximizes the performance through the network by taking advantage of full duplex operation

- IEEE 802.3x Flow Control

Provides a flow throttling mechanism propagated through the network to prevent packet loss at a congested node

- Jumbo packet support

Supports up to 9600-byte frame size to improve the performance of large data transfers

- Cable diagnostics

Detects cable issues remotely using a browser-based tool

### Layer 2 switching

- 8K MAC addresses

Provide access to many Layer 2 devices

- Spanning Tree Protocol (STP)

Supports standard IEEE 802.1D STP, IEEE 802.1w Rapid Spanning Tree Protocol (RSTP) for faster convergence, and IEEE 802.1s Multiple Spanning Tree Protocol (MSTP)

- VLAN support and tagging

Supports up to 64 port-based VLANs and dynamic configuration of IEEE 802.1Q VLAN tagging, providing security between workgroups

- BPDU filtering

Drops BPDU packets when STP is enabled globally but disabled on a specific port

- Internet Group Management Protocol (IGMP) and Multicast Listener Discovery (MLD) Protocol snooping

Controls and manages the flooding of multicast packets in a Layer 2 network

### Quality of service (QoS)

- Traffic prioritization

Provides time-sensitive packets (like VoIP and video) with priority over other traffic based on DSCP or IEEE 802.1p classification; packets are mapped to eight hardware queues for more effective throughput

- Advanced classifier-based QoS

Classifies traffic using multiple match criteria based on Layer 2, 3, and 4 information; applies QoS policies such as setting priority level and rate limit to selected traffic on a per-port basis

- Broadcast control  
Allows limitation of broadcast traffic rate to cut down on unwanted network broadcast traffic
- Rate limiting  
Sets per-port ingress enforced maximums and per-port, per-queue minimums
- Powerful QoS feature  
Supports the following congestion actions: strict priority queuing (SP), weighted round robin (WRR) queuing, and SP+WRR
- Selectable queue configuration  
Allows for the adjustment of queue priority to optimize traffic flow and increase performance. Select the number of queues and associated memory buffering that best meet the requirements of the network applications

### **Security**

- Advanced access control lists (ACLs)  
Enables network traffic filtering and enhances network control using MAC- and IP-based ACLs; time-based ACLs allow for greater flexibility with managing network access
- IEEE 802.1X and RADIUS network logins  
Controls port-based access for authentication and accountability
- Port security  
Combines and extends IEEE 802.1X and MAC authentication to provide MAC-based network access control
- Secure Sockets Layer (SSL)  
Encrypts all HTTP traffic, allowing safe access to the browser-based management GUI in the switch
- Port isolation  
The port isolation feature isolates Layer 2 traffic for data privacy and security without using VLANs. This feature can also be used to isolate the hosts in a VLAN from one another
- ARP attack protection  
The ARP detection feature enables access devices to block ARP packets from unauthorized clients to prevent user spoofing and gateway spoofing attacks
- Automatic VLAN assignment  
Assigns users automatically to the appropriate VLAN based on their identity, location, and time of day
- STP BPDU port protection  
Blocks Bridge Protocol Data Units (BPDUs) on ports that do not require BPDUs, preventing forged BPDU attacks
- STP root guard  
Protects the root bridge from malicious attacks or configuration mistakes
- Automatic denial-of-service protection  
Monitors for malicious attacks and protects the network by blocking the attacks
- Management password  
Provides security so that only authorized access to the Web browser interface is allowed

**Management**

- Command-line interface (CLI)

Provides a secure, easy-to-use CLI for configuring the module via SSH or a switch console; provides direct real-time session visibility
- Secure Web GUI  
Provides a secure, easy-to-use graphical interface for configuring the module via HTTPS
- Console port  
Simplified setup and initial configuration using an RJ-45 console port
- SNMPv1, v2c, and v3  
Facilitates management of the switch, as the device can be discovered and monitored from an SNMP management station
- Network management  
HPE Intelligent Management Center (IMC) centrally configures, updates, monitors, and troubleshoots
- Management Security  
Restricts access to critical configuration commands; offers multiple privilege levels with password protection; ACLs secure Telnet and SNMP access; local and remote syslog capabilities can log administrative actions
- Network Time Protocol (NTP)  
Synchronizes timekeeping among distributed time servers and clients; keeps timekeeping consistent among all clock-dependent devices within the network so that the devices can provide diverse applications based on the consistent time
- Dual flash images  
Provides independent primary and secondary operating system files for backup while upgrading
- FTP, TFTP, and SFTP support  
Offers different mechanisms for configuration updates; FTP allows bidirectional transfers over a TCP/IP network; trivial FTP (TFTP) is a simpler method using User Datagram Protocol (UDP); Secure File Transfer Protocol (SFTP) runs over an SSH tunnel to provide additional security
- Remote monitoring (RMON)  
Uses standard SNMP to monitor essential network functions; supports events, alarm, history, and statistics group plus a private alarm extension group
- Telnet/SSH support  
Provides a secure access to remotely manage the device through a command-line interface

**Convergence**

- LLDP Media Endpoint Discovery (MED)  
Defines a standard extension of LLDP that stores values for parameters such as QoS and VLAN to automatically configure network devices such as IP phones
- PSE PoE forwarding  
Device can forward PoE power to attached downstream devices. If powered by a PoE+ switch or power injector, unit can power two attached devices with a total power budget of 15.4 watts; if powered by a PoE switch or injector, unit can power one attached device with a total power budget of 4 watts

- PoE allocations

Supports multiple methods (automatic, IEEE 802.3af class, LLDP-MED, or user-specified) to allocate PoE power for more efficient energy savings

- Auto voice VLAN

Recognizes IP phones and automatically assigns voice traffic to dedicated VLAN for IP phones

**Additional information**

- Green initiative support

Provides support for RoHS and WEEE regulations

- Green IT and power

Improves energy efficiency through the use of the latest advances in silicon development; shuts off unused ports reducing energy costs

- Energy Efficient Ethernet

Compliant with IEEE 802.3az standard requirements to save energy during periods of low data activity

**Warranty and support**

- Limited Lifetime Warranty

See [hpe.com/networking/warrantysummary](http://hpe.com/networking/warrantysummary) for warranty and support information included with your product purchase.

## HPE NJ5000 Walljack Switch Series

### SPECIFICATIONS

### HPE NJ5000 5G PoE+ Walljack (JH237A)

#### I/O ports and slots

5 RJ-45 auto-negotiating 10/100/1000 ports (IEEE 802.3 Type 10BASE-T, IEEE 802.3u Type 100BASE-TX, IEEE 802.3ab Type 1000BASE-T)  
Supports a maximum of 5 autosensing 10/100/1000 ports

#### Additional ports and slots

1 RJ-45 serial console port

#### Physical characteristics

Dimensions 3.39(w) x 1.38(d) x 4.72(h) in. (8.6 x 3.5 x 12 cm)  
Weight 0.44 lb (0.2 kg)

#### Memory and processor

Single Core @ 500 MHz, 32 MB flash; Packet buffer size: 512 KB, 128 MB DDR SODIMM

#### Mounting and enclosure

Mounts in a standard wall outlet box or on optional Flush Mount/Desktop Mount kit

#### Performance

100 Mb Latency < 40  $\mu$ s (LIFO 64-byte packets)  
1000 Mb Latency < 8  $\mu$ s (LIFO 64-byte packets)  
Throughput Up to 7.4 Mpps (64-byte packets)  
Routing/Switching capacity 10 Gbps  
MAC address table size 8192 entries

#### Reliability

MTBF (years) 50

#### Environment

Operating temperature 32°F to 113°F (0°C to 45°C)  
Operating relative humidity 5% to 95%, noncondensing  
Nonoperating/Storage temperature -40°F to 158°F (-40°C to 70°C)  
Nonoperating/Storage relative humidity 5% to 95%, noncondensing  
Altitude Up to 16,404 ft (5 km)  
Acoustic Pressure: 0 dB No Fan

#### Electrical characteristics

Description The device is powered by a standard IEEE 802.3af PoE or IEEE 802.3at PoE+ power source. Local DC power is not supported. User must provide a standards-compliant PoE/PoE+ switch or power injector in order to power this device.  
Voltage Powered by PoE (depending on power supply chosen)  
Maximum power rating 26.8 W  
Idle power 6.7 W

#### Notes

Idle power is the actual power consumption of the device with no ports connected.  
Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated.

#### Safety

CSA 22.2 No. 60950; EN 60950/IEC 60950; UL 60950

## SPECIFICATIONS (CONTINUED)

## HPE NJ5000 5G PoE+ Walljack (JH237A)

<b>Emissions</b>	FCC part 15 Class A; VCCI Class A; EN 55022 Class A; CISPR 22 Class A; EN 55024; EN 61000-3-2 2000, 61000-3-3; ICES-003 Class A
<b>Management</b>	IMC—Intelligent Management Center; Command-line interface; Web browser; SNMP manager; IEEE 802.3 Ethernet MIB
<b>Notes</b>	Device does not come with a power adapter for local powering. Only powered by Power over Ethernet, either a PoE+ or PoE switch or a PoE power injector. Power source must be provided by the user. Console cable is not provided with HPE NJ5000 5G PoE+. The console cable 5184-6719 is shipped with many HPE products, such as HPE 1620, 19XX, 5120 SI and 5130 EI switches. The part can also be purchased separately on Hewlett Packard Enterprise parts store PartSurfer.
<b>Services</b>	Refer to the Hewlett Packard Enterprise website at <a href="http://hpe.com/networking/services">hpe.com/networking/services</a> for details on the service-level descriptions and product numbers. For details about services, and response times in your area, please contact your local Hewlett Packard Enterprise sales office.
