SB67070

SIP gateway

The AT&T Synapse® SB67070 SIP gateway supports up to 16 simultaneous SIP sessions (calls) and can register with up to four different service providers at the same time. It integrates seamlessly into existing Synapse systems using the SB67010 analog PSTN gateway and the SB67060 T1/PRI gateway. Or, it can be used on its own and/or in conjunction with Synapse SIP gateways at remote locations for interbranch calling. It supports external calling for up to 100 extensions and offers full control over inbound call routing (with or without DID numbers), including configurable dial string rules for automatic route selection (ARS) and least cost routing (LCR).

System features

Capacity: 100 extensions, 16 PSTN lines, 16 SIP trunks and PRI	Caller ID*, do not disturb (DND)
Supports multi-line appearances (MLA) or multi-call appearances (MCA)	System-wide and zone paging
Supports DHCP servers for automatic IP address assignment	Voicemail-to-email forwarding
Call forwarding, transfer, 3-party conference, redial log	100 number system phonebook
30 minutes of voicemail storage per extension**	Automatic clock setting using NTP
Automated attendant (up to 4; 20 menus)	English/French setup menus (CAN)
