Axis introduces out-of-the-box-ready recording solutions

AXIS Camera Station S10 Recorder Series comprises three out-of-the-box-ready desktop and rack-server models. The new series offers recording solutions that will simplify installation and setup for mid-sized installations such as schools, industries and larger retail stores that require a feature-rich system for high-definition surveillance.

Axis Communications, the world leader in network video, today announces AXIS Camera Station S10 Recorder Series. AXIS Camera Station is preloaded on high-quality servers and configured to perfectly match Axis' wide range of network cameras, providing both ease of installation and reliability.

“Axis continuously develops innovative products and solutions in order to optimize our customer's businesses. AXIS Camera Station S10 Recorder Series presents packaged, plug and play solutions that help our customers easily get up and running with their mid-sized video surveillance installation,” says Peter Friberg Axis' Director Solution Management.

AXIS Camera Station S10 Recorder Series are out-of-the box-ready recording solutions for high-definition surveillance ([see film](#)).

AXIS Camera Station S10 Recorder Series consists of:

- AXIS S1016, workstation model for use in office environments for installations up to 16 video channels
- AXIS S1032, rack server model for installations of up to 32 video channels
- AXIS S1048, rack server model for installations of up to 48 video channels

[AXIS Camera Station](#) video management software is pre-installed. The software offers an intuitive user interface with features to meet the demand for effective and active surveillance such as a flexible live view layout, site maps, powerful event configuration, efficient alarm management and responsive PTZ control. System settings such as camera and storage are configured to further simplify system setup and maximize performance.

Hardware components such as hard-discs, graphic card and CPUs, as well as storage capacity are optimized to meet the demands for reliable high-definition surveillance. To further safeguard system uptime, the package includes hardware and software support for three years.

Further features of AXIS Camera Station S10 Recorder Series include:

- Pre-installed system software such as Windows 7
- The recorders are easily scalable with additional AXIS Camera Station licenses
- Support for multiple screens
- AXIS Camera Station S9001 Desktop Terminal available as an option

AXIS Camera Station S10 Recorder Series is expected to be available in the US, Canada in October and in EU countries in December 2014 through Axis' distribution channels.
