

AXIS Companion

a complete video surveillance solution
for small businesses

Do you own a small business? Do you want to protect your staff, assets and premises? AXIS Companion is a professional solution developed with small businesses in mind, making sure it's quality you can rely on but doesn't require a huge budget.

AXIS Companion is a solution built around a software which allows you to view live or recorded video locally or remotely and even on the move. Dedicated IP-cameras record video that can be stored on a recorder or SD-card, depending on your needs. The video can easily be shared.

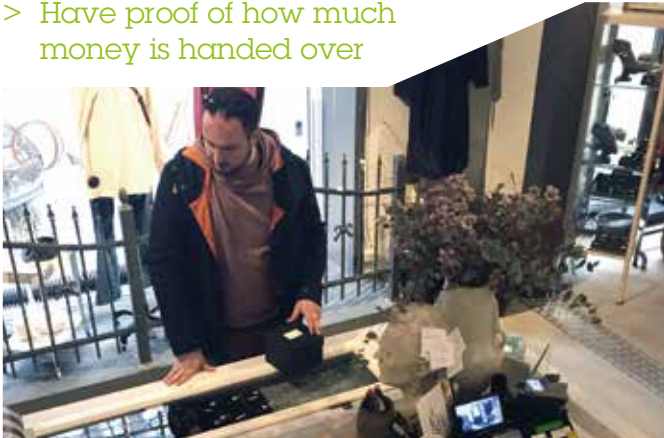

Read how others benefited from the same solution at
www.axiscompanion.com/customer-stories

This solution works both for single and multiple locations, and it scales to match your changing business needs.

> Keep your staff safe

> Have proof of how much money is handed over

> Record suspect actions and use video as proof

There are different situations when video surveillance can be extra useful:

- > General surveillance for identifying people and objects
- > Monitoring outdoor premises day and night
- > Detect incidents indoors after hours

If you are interested in AXIS Companion video surveillance or want to discuss your specific needs, please contact:
